DIGITIZATION AND eRECORD MANAGMENT

ECM - TARIKH QATAR (QATAR HISTORY)

كتــارا
katara

Business Objectives

› The project aims to build a digital preservation and management platform that encourages the preservation of Qatari history and promote Qatar culture and heritage
› The platform store multi type of content like videos, audios, photos, Books, Family tree & maps
› The platform provide general content to public and special content for specialist researchers

malomatia's Role

› Install and customize EMC Documentum & EMC Captiva system:
  - Store and index historical material digitally (documents, personal papers, newspaper articles, audio visual recordings, etc.)
  - Internal workflow has been implemented for review and approval cycle
› Build an interactive Portal (SharePoint 2013) with:
  - A presentation in a family tree of the ruling family
  - A Timeline of key events in Qatar's history
  - A Map of Qatar that shows key historical sites

Results Achieved

› Public portal (SharePoint) that represent Qatar History accessible by public and specialist researchers
› Back-end repository (Documentum, Captiva & D2) accessible by back-office (Katara employees) to feed the system with information and store the content
› Documentum IDS setup (Integration layer between Documentum and SharePoint)
